-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ONE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to an electronic shopping system comprising an arrangement presenting a description of a sales item, classified in class 705, subclass 27.
  - II. Claims 9-12, drawn to a system comprising an automated financial, business, or management practice or arrangement for electronic shopping (e.g., remote ordering), classified in class 705, subclass 26.
  - III. Claims 13 and 14, drawn to a method of business, finance, or management comprising generic or non-electrical computing, classified in class 705, subclass 500.
  - IV. Claims 15 and 16, drawn to a method of business, finance, or management comprising calculation of a sales price, classified in class 705, subclass 400.
  - V. Claim 17, drawn to a data processing apparatus for manipulating data structure (e.g. compilation), classified in class 707, subclass 101.
  - VI. Claims 18-21, drawn to a networked electrical computer or digital processing system comprising remote server accessing, classified in class 709, subclass 219.
  - VII. Claim 22, drawn to a networked electrical computer or digital processing system comprising remote data accessing by means of interconnected networks, classified in class 709, subclass 218.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions III and IV are each related to each of Inventions I, II, and V-VII, as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, each process as claimed can be practiced by another, materially different apparatus, or by hand, such as by hand.

Inventions I and III are respectively related to Inventions II, IV, and V as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combinations as claimed do not require the particulars of the subcombinations as claimed, because a system in accordance with either of Inventions I or III need not include any provision for multiple selections of items. The subcombinations each have separate utility by themselves.

Invention VI is related to Invention V as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combination as claimed does not require the particulars of the subcombination as claimed,

because a system in accordance with Invention VI need not include any provision for totaling. The subcombination has separate utility by itself (i.e., without any item data provider).

Lastly, Invention VII is related to Invention VI as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combination as claimed does not require the particulars of the subcombination as claimed, because a system in accordance with Invention VII need not include any accommodation for purchase managers. The subcombination has separate utility by itself (i.e., without any network).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Sean M. McGinn (Reg. N<sup>o</sup> 34,386), attorney for applicant, on January 6, 2005, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).

***Conclusion***

6. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is **(703) 305-1525**, and whose facsimile number is **(703) 746-3976**.

The examiner can normally be reached weekdays from 9:30 to 6:00.

Inquiries of a general nature or simply relating to the status of the application should be directed to the receptionist, whose telephone number is **(703) 308-1113**.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Mr. Robert Olszewski, can be reached at **(703) 308-5183**.

Official replies to this Office action may be submitted by any *one* of fax, mail, or hand delivery. **Faxed replies are preferred and should be directed to (703) 872-9306** (fax-back auto-reply receipt service provided). Mailed replies should be addressed to "Commissioner for Patents, PO Box 1450, Alexandria, VA 22313-1450." Hand delivered replies should be left with the receptionist on the seventh floor of Crystal Park Five, 2451 Crystal Dr, Arlington, VA 22202.
